

## Payroll Benchmark Survey Report

### CLASSIFICATION OF RESPONDENTS

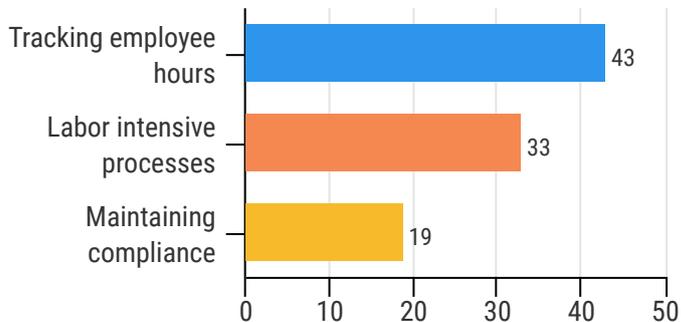

The survey captured responses from a wide variety of organizations, spanning **four** major industries - **automotive, retail, restaurant and nonprofit.**

### KEY IMPLICATIONS

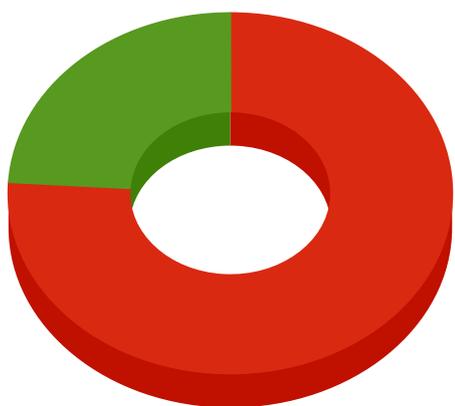

**62%** of the respondents are predicting that their company will grow over the next few years

\* With strong expectations for growth, small and medium businesses are well-positioned to make improvements and technological upgrades. However, with growth comes additional challenges as employers over 50 are required to file ACA reporting. Tracking hours manually becomes an even greater burden along with a higher risk of keying errors with more employees.

**3** payroll related challenges faced by SMBs are:

1. Tracking employee hours
2. Labor intensive processes
3. Maintaining compliance

**76%** of the respondents indicate that they do not have a dedicated payroll department

\* Not having a dedicated payroll department takes long hours to solve everyday payroll related issues. However, by partnering with trusted payroll specialists, SMBs can optimize internal productivity, manage risk and reduce their payroll processing costs.
